The remains of Villa were cremated several weeks ago, but his body still goes marching on.

Our soldier boys on the border expected to live on milk and honey while keeping peace along the Mexican frontier; instead Houston is supplying them with 20,000 gallons of the sourest kind of pickles.

Let the poor candidate for political office, his trials will be heartbreaking from now on until election day.

President Wilson is in favor of pork, and if necessary would probably come out in a diplomatic letter, for beans

In another week or ten days the average American will stop thinking and put in his time talking politics.

What has become of the discoverer of a cheap substitute for gasoline? He has disappeared from the limelight.

As soon as a man begins to like the sound of his own voice, he wants to engage in a joint discussion with somebody.

RANGE OF RACHEL'S VOICE

In Speaking, the Famous French Actress Had a Compass of Two Full Octaves.

A Prussian prince, a cousin of the German Emperor William I., has left some curious notes upon Rachel, of whom he was a great admirer. These have been quoted in a lecture upon the famous actress. The prince studied her elocution from a musical standpoint and took down notes of her voice as she delivered some of her most effective speeches. He found, for instance, that in a passage of Racine's "Bajazet" she went down to F in the bass. In one of "Andromaque" and another of "Adrienne Lecouvreur" her voice spoke a word on the upper E, and uttered a cry on upper F sharp. Her speaking voice thus had a compass of two full octaves. But, as a rule, he observed that she used only seven notes, consisting of the first seven ascending notes from the bass of the scale of F sharp minor, but with the D sharp ended.

It would be curious to know—but the prince does not seem to have ascertained—whether this musical notation of Rachel's speaking voice is rigorous and inviolable, and it would be worth a musician's while to apply the same study to some contemporary actors and actresses.
